FLYMAR

We build next-generation electric hydrofoil fleets

10 and 30 passenger versions

High-Speed Efficiency:

30+ knots with 80% less energy consumed per nautical mile.

Low-OPEX Comfort:

90% less wave impact and up to 70% lower lifecycle operating costs.

Retractable Foils · Minimal Infrastructure:

Min draft 0.6 m. Zero wake at speed; standard floating pontoons.

Software-Defined Mobility:

100% digital architecture ready for remote transit and autonomous dispatch.

FLYMAR

The Inevitable Future of Water mobility

The only way for environmantal friendly(electric propulsion) high-speed city commute (no wake)

Bypasses saturated land transit with zero road or rail CAPEX

Radically lower unit economics and total decarbonization

FLYMAR

What We Do Differently:

Software-Defined Vessels

Autonomy First — Built Around Software & Sensors

Unlike traditional shipyards that add electronics as an afterthought, we design intelligence first and build the vessel around it. Computer vision and multi-sensor suites provide total situational awareness natively.

FLYMAR Control Unit — In-House Digital Architecture

Proprietary core electronics eliminate third-party black boxes. Full drive-by-wire controls enable real-time agility and seamless remote operation from shore or autonomous repositioning.

Intelligent Flight Control & Direct E-Drive

Millisecond dynamic foil adjustments ensure maximum efficiency and an unshakable ride, paired with an in-house underwater direct-drive electric propulsion unit with minimal moving parts for radically lower maintenance.

FLYMAR F8

All-electric, 10-passenger hydrofoil shuttle engineered for high-frequency urban transit and luxury resort connectivity.

10	22	40
passengers capacity	knots cruise	NM range

FLYMAR F11

Coming in 2027

Designed to move people profitably. A commercial transit platform in development for cities, transport authorities and fleet operators.

30	25	50
passengers capacity	knots cruise	miles range

FLYMAR

Target specifications of FLYMAR F8

Max Capacity	10 passengers + 1 Crew
Range	45 NM
Max Speed	30 knots
Cruise Speed	25 knots
Motor	2 × 50 kW
Charging	Shore Power & DC Fast Charging
Battery Capacity	80 kWh or 120 kWh

FLYMAR

Target specifications of FLYMAR F11

Passenger Capacity	30 passengers
Range	50 miles
Cruise Speed	25 knots
Availability	In development · Coming in 2027
